

# RAILY L. ALMERON JR II

Quezon City, Philippines | yliarnoremla@gmail.com | railyalmeron.vercel.app | 09064458329

## SUMMARY

Recent IT graduate with hands-on experience in UI/UX design, front-end development and RF field engineering. Skilled in Figma and Wix Studio for wireframing and prototyping, with practical exposure to spectrum analysis, antenna testing and field mapping tools like QField and Maps.me. Strong problem-solving, communication and troubleshooting skills, with a commitment to continuous learning across design and technical disciplines.

## ACADEMIC EXPERIENCE

### Technological Institute of the Philippines

Cubao, Quezon City

BS in Information Technology, Digital Arts and Design

June 2026

Thesis: PubSpeaker: A Mobile Application for Enhancing Public Speaking through AI-Driven Feedback

Relevant Coursework: Drive Test Engineer, System Administration, Frontend Development, Game Testing and Quality Assurance, User Interface Design, IT Hardware and System Support

## EXPERIENCE

### INES Solutions - RF Interference Engineer

July 31 – Present

- Performed source verification by testing Paddle and Yagi antennas to determine whether an interference source was active or not active
- Conducted source tracking to locate signal sources (Paddle and Yagi antennas) and assessed their active/inactive status in the field
- Used spectrum analyzer equipment to detect, measure and analyze RF signals during interference investigations
- Utilized QField, Google Earth, Google Maps and Maps.me for field mapping and geolocation of interference sources during site surveys

### INES Solutions - RF Interference Engineer Trainee

July 13 – July 27, 2026

- Assisted senior RF engineers in source verification by observing and performing basic tests with Paddle and Yagi antennas to determine whether interference sources were active or inactive
- Participated in source tracking activities to help locate RF interference sources under the guidance of experienced engineers
- Gained hands-on experience operating spectrum analyzer equipment to monitor, detect, and interpret RF signals during field investigations
- Assisted with field mapping and geolocation of interference sources using QField and Maps.me during site surveys
- Assisted in 2G/4G/5G drive testing and basic evaluation of cellular network performance and coverage
- Gained exposure to key drive test parameters including RSRP, RSRQ, SINR, RSSI, throughput, latency, call setup success, and handover performance
- Assisted in identifying areas with weak signal, poor coverage, and potential network performance issues during field testing
- Learned RF interference investigation procedures, field safety practices, and proper use of RF testing and measurement equipment

### PRIME Philippines - UI Designer Intern

August 12 – December 12, 2025

- Designed user interfaces and wireframes for PRIME Philippines and GreatWork Global
- Designed and built the user interface for EDUCO Solutions, implementing responsive web design principles to enhance user navigation
- Co-developed the GreatWork Global website, translating wireframes into functional web pages while optimizing cross-browser compatibility
- Collaborated with cross-functional development teams to translate Figma interactive prototypes into responsive front-end code, ensuring high fidelity to the original designs

---

## CERTIFICATIONS

---

### Philippines Drive Test Engineer

July 20, 2026

- (Huawei) PRO RF iLearning Course for DTE/DTA/RNO

### Installing and Configuring Computer Systems

December 9, 2025

- Technical Education and Skills Development Authority (TESDA), eTESDA Online Program

---

## SKILLS & INTERESTS

---

### Technical Skill

- Drive Test Engineering: PHU Smart, RF Interference Investigation, RF Source Verification, RF Source Tracking, Spectrum Analysis, RF Field Survey, Field Data Collection, GPS Coordinate Navigation, Geolocation Mapping
- RF Equipment: Spectrum Analyzer
- Field Applications: QField, Maps.me, Google Maps, Google Earth
- UI/UX Design: Figma, Wix Studio, Framer, Canva
- Front-End Development: HTML, CSS, JavaScript, TypeScript, ReactJS, React Native
- IT Support: Windows Installation, Computer Software & Hardware Troubleshooting, Software Installation, Computer Maintenance
- Networking Fundamentals: TCP/IP, DNS, DHCP
- Quality Assurance: Game Testing, Regression Testing, Bug Reporting
- Technical Knowledge: RF Signal Propagation, Spectrum Analysis Operating Systems, Computer Troubleshooting, UI/UX Principles, Responsive Web Design
